PROFILE

Software developer with a background in mathematics, computer science, and a decade of professional experience in the speedcubing industry. Builds frontend and full-stack applications with React, TypeScript, C#/.NET, Node.js, SQL, and MongoDB. Uses AI-assisted development to accelerate learning, explore implementation approaches, and improve system design.

PROJECTS

droobTimer — Speedcubing Timer & Statistics Platform

React • TypeScript

- Building a modern speedcubing timer with solve tracking, scramble generation, statistics, puzzle-specific workflows, and persistent browser storage.
- Designed a theme-driven frontend built almost entirely from custom-drawn assets, intentionally creating an imperfect, hand-drawn visual style.
- Developed reusable systems for statistics, puzzle-state handling, and responsive timer interactions, with planned gamification and progression features.

BLDLab — Blindfolded Speedcubing Training Platform

Full Stack

- Building a full-stack training platform for blindfolded speedcubing, including algorithm study, trainers, user profiles, letter schemes, and personalized data.
- Designed two independent backend systems: a Node.js/Express and MongoDB service for users, authentication, and user data, and a C#/.NET and SQL Server API powering an extensive database of blindfolded solving algorithms.
- Built the React frontend and integrated both backend services into a unified application for algorithm lookup, training, and user-specific workflows.

PROFESSIONAL EXPERIENCE

Production Manager — Cubicle Enterprises LLC

2015 – Present

- Manage production operations for a specialized speedcubing company, overseeing day-to-day workflows, process execution, and product-related production decisions.
- Apply nearly two decades of speedcubing expertise to products serving a highly technical enthusiast and competitive market.

TECHNICAL SKILLS

Frontend: React, TypeScript, JavaScript, HTML, CSS, Vite

Backend: C#, .NET, Node.js, Express

Data: SQL, MongoDB, Dapper, IndexedDB

Other Tools: Git, GitHub, Vercel, GitHub Copilot, Postman, SSMS

EDUCATION

St. Joseph's University - BS Mathematics

Empire State University - BS Computer Science
